

SRI NAIDU

Senior Clinical Data Manager
sri.naidu@example.com · www.linkedin.com/in/saps4/

PROFESSIONAL SUMMARY

Experienced Clinical Data Manager with over 25 years in the Pharmaceutical industry, specializing in data management activities for clinical studies across all stages of drug development. Proven ability to lead and contribute to data management documentation, including Data Management Plans, CRF Completion Guidelines, and Data Validation Specifications. Skilled in electronic data reconciliation, query generation, and ensuring compliance with SOPs and regulatory guidelines. Strong communicator adept at liaising with CROs and EDC vendors to ensure project timelines and quality standards are met. Demonstrated expertise in User Acceptance Testing and operational problem-solving based on metrics data and audit reports. Highly motivated and detail-oriented, with a commitment to achieving results in fast-paced environments.

Sri is a Senior Clinical Data Manager with approximately 27+ years of progressive consulting aligned to Pharmaceutical, PowerPoint, CDISC, CDASH.

Core focus includes Pharmaceutical, Data, Clinical Data Management, Data Management Plan, CRF Completion Guidelines, Data Validation Specification, E-Data Reconciliation, Query Generation.

Career progression moves from foundation delivery into expanding ownership and recent leadership on Senior Clinical Data Manager-aligned workstreams.

Hands-on experience with design workshops, build/test cycles, integration validation, cutover, and hypercare.

CORE COMPETENCIES

Core: Pharmaceutical · Data · Clinical Data Management · Data Management Plan · CRF Completion Guidelines · Data Validation Specification · E-Data Reconciliation · Query Generation · User Acceptance Testing · Compliance with SOPs · Regulatory Guidelines · CRO Liaison · EDC Vendors · Timelines Monitoring
Platforms & Integration: GCP Inspection Readiness · MS Office Suite · PowerPoint · CDISC · CDASH · SDTM · Problem Solving · Interpersonal Skills · facilitating workshops · SME-level guidance · SAC · and Data Sphere for process optimization · Clinical

SELECTED IMPACT

- Successfully led the development of comprehensive Data Management documentation for multiple clinical studies, ensuring adherence to regulatory standards.
- Streamlined data processing activities, resulting in a 20% reduction in query resolution time and improved data integrity.
- Oversaw User Acceptance Testing for clinical databases, enhancing the accuracy of data capture and reporting.
- Collaborated effectively with CROs and EDC vendors, ensuring timely delivery of project milestones and quality outputs.
- Implemented solutions to operational challenges identified through metrics data, improving overall study efficiency.

PROFESSIONAL EXPERIENCE

Senior Clinical Data Manager

Employer / Client: Collabera IT Services & Consulting, Dallas, TX

Dallas, TX | 2021 – Present
